INTRODUCTION

I felt there was a need for this book to assist people in their genealogy research. While all the details of the marriage are not included in this reference, it does allow one to quickly ascertain whether or not the record they are searching for is held in Nelson County. Once the identification of the marriage is confirmed by this work you may get the details by writing or going directly to the Nelson County Clerk's office. The grooms were alphabetized for your convenience and the brides are indexed in the back of the book.

One issue which I feel needs further explanation follows. When a couple comes into the county clerk's office to obtain a marriage license they leave there with the license which is good for 30 days. If no marriage occurs in the 30 days then the marriage bond (part that remains at the clerk's office) becomes void. The marriage bond remains in the marriage book and is therefore part of the record. The lower portion of the marriage bond will be filled in by the clerk when the marriage license is returned by the bridal party. In a few instances the couple does not marry, or forgets to return the license, or returns the license to the wrong county. So when the bottom of the bond is never completed those of us looking at it can't be sure as to whether a marriage occurred or not. All of those records were included in this book, but when the bond was not completed I typed the following words in the Officiator column: bond date.

As with any work of this magnitude there are certain to be a few errors, but every effort was made to minimize that.

I would like to thank my husband Bill, my children Jorra, Aaron and Vincent and my granddaughter Paige. For without their love and support this book would not be possible.

Nothing may be published in any form without the written consent of the author.

This book is self published and may be purchased by contacting me for the current price through any of the following methods.
